

### Gas Monkey Garage is back for Eighth Season

Gas Monkey Garage, featured in the popular cable TV show focused on custom cars, is back for its eighth season. Star Richard Rawlings and his crew continue to use Valspar Automotive's DeBeer Refinish products to help them turn run-down hot rods into fully restored, unique show pieces.

Rawlings, the owner of Gas Monkey Garage and visionary behind the custom cars, said he is thrilled to continue using DeBeer Refinish products in the show's work.

"Valspar has always taken care of my shop and our paint needs, and they continue to do so as we roll into our eighth season," Rawlings said. "It's critical that any paint we choose is easy to use, particularly in the fast-paced environment of our show. That's what we get from DeBeer."

Rawlings and his crew use DeBeer BeroBase 500, a high-quality basecoat system.

"From Ferraris to Trans Ams, the team at Gas Monkey Garage uses Valspar's DeBeer 500 System and coatings to bring these beauties to life," said Gina Mahan, Brand Manager for House of Kolor, Valspar's custom refinish brand. "Although DeBeer is an OEM-approved refinish brand, Gas Monkey Garage showcases its versatility with the incredible builds they produce. We are proud to continue to support such talent and look forward to seeing where season eight takes Richard Rawlings and Gas Monkey."

### Reminder: VOC and GHS Compliance Requirements

Valspar Automotive offers a wide variety of products to meet customer requirements in many different markets. Several federal, local, and state regulations restrict sales of certain products in areas with Volatile Organic Compound ("VOC") Emission Standards. While Valspar Automotive can provide tools to assist you in determining whether specific products meet these requirements, it is ultimately your responsibility to ensure that you only offer for sale products that are compliant with applicable regulations. Our product labels and Technical Data Sheets (TDS) provide the VOC information you will need to determine whether a product meets the specific requirements for a location.

Remember, the Occupational Safety and Health Administration's (OSHA) adopted the Globally Harmonized System of hazard communication (GHS), effective 2015. These new rules apply to Safety Data Sheets (SDS) and product labels for hazardous chemicals. OSHA requires chemical distributors to ship containers featuring GHS-compliant labels. If there is any old stock with pre-GHS labels, a GHS-compliant label must be supplied for each and every individual container shipped.

You can also check our websites at [www.valsparauto.com](http://www.valsparauto.com), [www.valsparrefinish.com](http://www.valsparrefinish.com), [www.de-beer.com](http://www.de-beer.com) and [www.houseofkolor.com](http://www.houseofkolor.com) for GHS SDS', TDS', and other product regulatory information. If GHS-compliant labels are needed, please call Valspar Automotive's Customer Service at 1-800-444-2399.

### New Valspar Automotive Global Color Box

At Valspar Automotive, providing you with premium, efficient color tools is an essential part of our color program. Recently, our latest color boxes have arrived from Europe and are ready to ship. Due to a change in the process and manufacturing, costs have increased. This new price will reflect immediately in orders. The Global Color Box has been updated to reflect the color update #27.

Global Color Box, 61800 is now available through Valspar Automotive's Customer Service. For more information or to order, please contact Valspar Automotive's Customer Service at 1-800-444-2399.

Part Number	Description
61800	Global Color Box

H2180.L25	Medium Activator for EC21	2.5 Liter	2
H2190.L25	Slow Activator for EC21	2.5 Liter	2

## House of Kolor Launches Redesigned Website

House of Kolor recently launched its redesigned website. The website is designed "to be every painter's guidebook to the world of kustom painting."

Brand Manager Gina Mahan said the site was designed with ease of use as the primary objective.

"The new site allows body shop owners and painters to get what they need faster," she says. "It contains a lot of great information, and at the same time, it's very easy to navigate. So it's the best of both worlds. And as you'd expect from a House of Kolor site, it has striking photos and images of custom cars and motorcycles that will make people want to visit the site again and again."

The site features the following elements:

- Comprehensive information at your fingertips: Products, purchase information, tips, trick and inspiration
- Search with any device
- Pick your "kolor" to find the perfect match for your project
- House of Kolor Distributors that features a comprehensive interactive list to find a distributor near you
- Easy to find formulas and access to technical information

Check out the newly redesigned House of Kolor website at [www.houseofkolor.com](http://www.houseofkolor.com) today!
