valspar AUTOMOTIVE

Precise.
Simple.
Smart.

The Valspar Spectrophotometer is built around two simple truths: You need precise color matches, and you need a tool that is easy to use for everyone in your shop.

How do we deliver a precise color match? Start with a color library many times greater than a standard color box. Ensure that you can match original vehicle manufacturer colors – even difficult-to-match colors — and update new formulations regularly. The result is the best color match, less rework and optimized profitability.

Designed by users, the Spectrophotometer not only delivers a precise color match, it's also easy to use. Think plug-and-play technology, minimal training requirements, multiple languages and simple calibration. The Smart Formulation Option ensures a color match in all types of lighting. The Spectrophotometer alerts you if it needs to be calibrated, assuring you will always get the best possible color match.

The Spectrophotometer is precise, simple and smart. A precision color match is just a click away.

66360 SPECTROPHOTOMETER

- LED Light Technology

- Uses 4 AA batteries, good for 1000 measurements

- 2 year warranty on Spectrophotometer

- 10 year warranty on light

Spectrophotometer Features Include:

- Precise color match

- Easy to use

- Customization option for your needs

- Stores multiple readings

- Works with all Valspar Color Software

- Smart formulation option to prevent use of complementary colors

- Formulates solid base coat colors on demand

- Calculates and displays color match accuracy

VALSPAR COARSENESS SELECTOR

- Helps identify the correct degree of coarseness for effect and metallic colors

- Increases the accuracy of color measurement — to help create the perfect color match

- Included in all Spectrophotometer orders
