

The Valspar Corporation
Valspar Automotive Training Center
Acknowledgment of Medical Clearance

Dear Valspar Automotive Training Participant:

Thank you for your interest in Valspar Automotive's Training Programs. We are excited to provide you with the opportunity to learn about the use of Valspar Automotive products for automobile refinishing projects. Part of the training requires preparation and spray coating of automotive parts in a state-of-the-art paint booth setting using automotive refinish products. Spray coatings involve the use of chemically reactive paint and coating products and may take place in warm and/or humid environments. Use of Personal Protective Equipment (PPE), including gloves, full-body protective suits, eye protection and respirators, is mandatory during the "hands-on" portions of the training program. Training course participants are required to have obtained medical clearance for the use of respirators and PPE prior to participating in a Valspar training center activity. By signing below, you are acknowledging that you have received the appropriate medical clearance for the use of PPE and respirators and that you are medically fit to participate in these training activities. More information on the training program is available at <http://www.valsparauto.com/automotive/training.jsp>.

- I have reviewed and understand the expectations of the Valspar Automotive training program and hereby represent and acknowledge that I have the appropriate medical clearance for the training activities, including the use of PPE and respirators.
